PROFESSIONAL SUMMARY

Full-stack software engineer with nearly two years of commercial experience across software development, quality assurance, IT infrastructure, and business analysis. Contributed to four enterprise platforms — RCPOS, RCPOS Lite, RC Smart Retail, and RC Convergio — serving retail and hospitality clients. Graduated with a National Diploma in Information Technology (Software Development), achieving the highest Work Integrated Learning mark in the cohort (94%). Fluent across the full SDLC: REST API design, relational database modelling, cloud deployment, CI/CD automation, and automated testing. Currently deepening PHP, Alpine.js, and SQL expertise in preparation for an intermediate full-stack developer role.

TECHNICAL SKILLS

Languages: C# 14, PHP 8.5, Java 26, JavaScript ES2026, TypeScript 5.13, SQL, Kotlin 2.3, Python 3.13
Frontend: Angular 22, React 19, Vue.js 3.5, Blazor (.NET 10), Alpine.js 3.14, Tailwind CSS 4.1, Bootstrap 5.3, RxJS 7.8
Backend: ASP.NET Core 10, ASP.NET 4.8.1, Laravel 13, Spring 7, Maven 3, Node.js 24 LTS, Express 5, SignalR, REST APIs
Databases: SQL Server 2025, MySQL 9.3, PostgreSQL 17, MongoDB 8, Firebase 11, HeidiSQL 12 — design, stored procedures, query optimisation, normalisation
Cloud and DevOps: Microsoft Azure, Azure DevOps, Docker 27, GitHub Actions, CI/CD, Laravel Forge, Netlify
QA and Business Analysis: Regression testing, UAT, functional testing, BRDs, bug reporting, Postman 11, API testing
Software Engineering: OOP, SOLID Principles, MVC, Repository Pattern, Dependency Injection, Agile, Scrum, SDLC, TDD
Infrastructure: Windows Server 2025, Linux Ubuntu 24.04 LTS, structured cabling, switch configuration, IT asset management, helpdesk support

WORK EXPERIENCE

Junior IT Engineer

February 2026 – Present

Reliance Corporation | Johannesburg, Gauteng

Promoted into a hybrid engineering role combining software development support, quality assurance, infrastructure operations, and business analysis for enterprise retail and hospitality software platforms.

Software Engineering and Business Analysis

- Gather business requirements directly from retail and hospitality stakeholders and produce Business Requirement Documents (BRDs) used by developers in sprint planning
- Review feature implementations against requirements and verify deliverables with the development team prior to release
- Recommended UX improvements based on customer feedback; changes subsequently implemented and shipped to production
- Assigned PHP 8.5, Alpine.js 3.14, and SQL reference documentation by senior engineers as part of a structured transition pathway toward an intermediate full-stack PHP developer role, building on existing Laravel and JavaScript experience

Quality Assurance

- Execute functional, regression, and user acceptance testing across RCPOS, RCPOS Lite, RC Smart Retail, and RC Convergio
- Report software defects with reproducible test cases and verify fixes prior to production deployment

Infrastructure and Support

- Maintain Windows Server 2025 and Linux (Ubuntu 24.04 LTS) environments; configure and troubleshoot enterprise networking
- Deliver Tier 1 and Tier 2 IT support and train end-users on software functionality

WORK EXPERIENCE (CONTINUED)

IT Software and Hardware Support Intern

August 2025 – January 2026

Reliance Corporation | Johannesburg, Gauteng

Software Development

- Completed structured full-stack training covering Git, HTML, CSS, JavaScript ES2026, PHP 8.5, Laravel 13, MySQL 9.3, SDLC, version control, and software engineering best practices
- Contributed to RCPOS and RCPOS Lite: feature development, CRUD implementation, database integration, QA testing, bug reporting, and requirements validation

Infrastructure — Office Relocation

- Rebuilt office network: traced Ethernet runs, re-punched network ports, crimped RJ45 connectors, connected infrastructure to switches, and assisted with server rack setup and CCTV installation

Hardware Support

- Helpdesk support, IT asset register maintenance, Windows installations, hardware diagnostics, and software deployment

PROJECTS

AdminForge — Multi-Tenant SaaS Management Platform

Laravel 13, Angular 22, Alpine.js 3.14, Docker 27, Stripe, Tailwind CSS 4.1

- Multi-tenant architecture with Role-Based Access Control, Stripe subscription billing, dashboard analytics, and real-time reporting
- Containerised with Docker 27 and deployed via Laravel Forge with lazy-loaded Angular modules

Helpdesk Ticketing System

ASP.NET Core 10, React 19, Azure, SignalR, Docker 27, GitHub Actions

- JWT-authenticated platform with role-based dashboards, ticket management, file uploads, and real-time notifications via SignalR
- Full CI/CD pipeline via GitHub Actions; containerised and deployed to Azure

Light of Literacy — Capstone Project (Rosebank Library)

Kotlin 2.3, Node.js 24 LTS, Express 5, MySQL 9.3, Firebase 11, Azure DevOps

- Led Agile team across five sprints as project manager and full-stack developer; built Android application, REST APIs, and relational database schema
- Configured Azure Pipelines and authored full technical documentation; awarded 94% — highest Work Integrated Learning mark in the graduating cohort

EDUCATION

National Diploma in Information Technology (Software Development)

December 2024

Rosebank College | NQF Level 6 | 360 Credits

Distinctions: Work Integrated Learning 3B 94%, Human Computer Interaction 91%, WIL 3A 87%, Web Development 82%, Software Quality and Testing 77%, Advanced Databases 76%

National Senior Certificate

December 2020

Horizon International High School | Higher Certificate and Diploma Pass | Science Stream

CERTIFICATIONS

- SkillUp Full Stack Development Certificate
- SkillUp Cloud Computing Fundamentals Certificate
