PROFESSIONAL SUMMARY

Full-Stack Software Engineer with nearly two years of commercial experience across software development, quality assurance, infrastructure operations, and business analysis. Experienced in supporting and developing enterprise retail and hospitality platforms, gathering business requirements, validating production releases, and contributing to scalable SaaS applications using Laravel, Angular, PHP, SQL, and modern web technologies. Combines hands-on software engineering skills with strong debugging, QA, infrastructure, and stakeholder collaboration experience, with a proven ability to work across the full software development lifecycle.

TECHNICAL SKILLS

Core Technologies: C#, PHP, JavaScript, TypeScript, SQL, Laravel, ASP.NET Core, ASP.NET, Angular, React, MySQL, SQL Server

Additional Experience: Vue.js, Node.js, Express, Spring, Kotlin, Blazor, Alpine.js, PostgreSQL, MongoDB, Firebase

Frontend: Tailwind CSS, Bootstrap, RxJS, HTML5/CSS3

Backend & APIs: REST APIs, SignalR, Maven

Cloud & DevOps: Microsoft Azure, Azure DevOps, Docker, GitHub Actions, CI/CD, Laravel Forge, Netlify

QA & Business Analysis: Regression testing, UAT, functional testing, BRDs, bug reporting, Postman, API testing

Software Engineering: OOP, SOLID Principles, MVC, Repository Pattern, Dependency Injection, Agile, Scrum, SDLC, TDD

Infrastructure: Windows Server, Linux (Ubuntu LTS), structured cabling, switch configuration, IT asset management, helpdesk support

WORK EXPERIENCE

Junior IT Engineer | Reliance Corporation | Johannesburg, Gauteng | Feb 2026 – Present

Progressed from an IT Software and Hardware Support Internship into a hybrid engineering role combining software development support, quality assurance, infrastructure operations, and business analysis for enterprise retail and hospitality platforms.

- Software Engineering and Business Analysis:
- Gather business requirements directly from retail and hospitality stakeholders and produce Business Requirement Documents (BRDs) used by developers in sprint planning
- Review feature implementations against requirements and verify deliverables with the development team prior to release
- Recommend UX improvements based on customer feedback; changes subsequently implemented and shipped to production
- Deepening PHP, Alpine.js, and SQL expertise while contributing to the organisation's full-stack development practices and progressing toward increased software engineering responsibility
- Quality Assurance:
- Execute functional, regression, and user acceptance testing across RCPOS, RCPOS Lite, RC Smart Retail, and RC Convergio
- Report software defects with reproducible test cases and verify fixes prior to production deployment
- Infrastructure and Support:
- Maintain Windows Server and Linux (Ubuntu LTS) environments; configure and troubleshoot enterprise networking
- Deliver Tier 1 and Tier 2 IT support and train end-users on software functionality

IT Software and Hardware Support Intern | Reliance Corporation | Johannesburg, Gauteng | Aug 2025 – Jan 2026

- Software Development:
- Contributed to RCPOS and RCPOS Lite: feature development, CRUD implementation, database integration, QA testing, bug reporting, and requirements validation
- Completed structured full-stack training covering Git, HTML, CSS, JavaScript, PHP, Laravel, MySQL, SDLC, and software engineering best practices
- Infrastructure — Office Relocation:
- Rebuilt office network: traced Ethernet runs, re-punched network ports, crimped RJ45 connectors, connected infrastructure to switches, and assisted with server rack setup and CCTV installation
- Hardware Support:

- Helpdesk support, IT asset register maintenance, Windows installations, hardware diagnostics, and software deployment

PROJECTS

Clusterfiy — Multi-Tenant SaaS Management Platform / *Laravel, Angular, Alpine.js, Docker, Stripe, Tailwind CSS*

- Multi-tenant architecture with Role-Based Access Control, Stripe subscription billing, dashboard analytics, and real-time reporting
- Containerised with Docker and deployed via Laravel Forge with lazy-loaded Angular modules

Helpdesk Ticketing System / *ASP.NET Core, React, Azure, SignalR, Docker, GitHub Actions*

- JWT-authenticated platform with role-based dashboards, ticket management, file uploads, and real-time notifications via SignalR
- Full CI/CD pipeline via GitHub Actions; containerised and deployed to Azure

Light of Literacy — Capstone Project (Rosebank Library) / *Kotlin, Node.js, Express, MySQL, Firebase, Azure DevOps*

- Led Agile team across five sprints as project manager and full-stack developer; built Android application, REST APIs, and relational database schema
- Configured Azure Pipelines and authored full technical documentation; awarded 94% — highest Work Integrated Learning mark in the graduating cohort

EDUCATION

National Diploma in Information Technology (Software Development) / *Rosebank College, NQF Level 6, 360 Credits* / Dec 2024

Distinctions: Work Integrated Learning 3B (94%), Human Computer Interaction (91%), WIL 3A (87%), Web Development (82%), Software Quality and Testing (77%), Advanced Databases (76%)

National Senior Certificate / *Horizon International High School, Science Stream* / Dec 2020

Completed 8 subjects including Pure Mathematics, Physical Sciences, Life Sciences, Engineering Graphics & Design, and Computer Applications Technology, alongside English, Afrikaans, and Life Orientation.

CERTIFICATIONS

SkillUp Full Stack Development Certificate

SkillUp Cloud Computing Fundamentals Certificate

LANGUAGES

English: Professional Working Proficiency

Sesotho: Native

Sepedi: Native
