

Thabang Mokgonyana

Junior IT Engineer (Operations & Software Coordination) |
Transitioning into Full-Stack Development

Johannesburg, Gauteng | 0794906530
thabangmokgonyana@gmail.com
LinkedIn | GitHub: MistRoku

PROFESSIONAL SUMMARY

Results-driven IT and operations engineer with 2 years of hands-on experience across infrastructure, QA, and software requirements — **actively transitioning into a dedicated software engineering role**. Earned a **94% Distinction — highest in cohort** — leading the full-stack build of Light of Literacy, a Kotlin/Node.js/MySQL library management system deployed via Azure DevOps. During a structured internship, built and deployed production PHP/Laravel POS applications to live client environments. Independently building a portfolio of full-stack applications using **Angular 17, React 18, ASP.NET Core 9, Laravel 11, PHP, Docker, and Microsoft Azure** — demonstrating self-driven development capability across multiple stacks. Combines real-world systems knowledge with proven engineering output. Targeting full-stack software engineering roles with a long-term goal of Solutions Architecture.

CORE COMPETENCIES

– Full-stack web & mobile development (portfolio)	– Windows & Linux server administration
– PHP 8 / Laravel 11 — MVC, Eloquent ORM, Sanctum	– Network infrastructure installation & configuration
– Angular 17 & React 18 (TypeScript) SPA development	– MySQL, SQL Server & Firebase database design
– ASP.NET Core 9 — Dapper, SignalR, JWT	– QA: regression, UAT, defect tracking (current role)
– CI/CD: Docker, GitHub Actions, Azure Pipelines	– Business Requirements Documentation (BRDs)
– Unit & integration testing (JUnit, Postman, 85%+ coverage)	– Agile / Scrum Azure DevOps Boards

PROJECTS

AdminForge — Multi-Tenant SaaS Management Dashboard

Laravel 11 · Angular 17 · MySQL · Stripe · Docker · Laravel Forge · Tailwind CSS

Self-directed portfolio project — built independently outside of employment.

- Architected a production-ready multi-tenant SaaS platform — Angular 17 frontend (lazy-loaded modules, HTTP interceptors, RxJS real-time dashboards, RBAC) and Laravel 11 backend (Eloquent ORM, Sanctum auth, multi-tenant team management).
- Integrated Stripe payment processing for \$10K+ in test transactions (payment intents, webhooks, billing portal); achieved 95% test coverage; deployed via Docker on Laravel Forge with zero-downtime releases.

Helpdesk Ticketing System — Cloud-Deployed Full-Stack Application

ASP.NET Core 9 · C# / Dapper · SQL Server · SignalR · React 18 (TypeScript) · Docker · GitHub Actions · Azure

Self-directed portfolio project — built independently outside of employment.

- ASP.NET Core 9 REST API (JWT auth, Dapper ORM, RBAC, SignalR real-time notifications) with React 18 (TypeScript) frontend featuring dashboard analytics and responsive mobile/desktop UI.
- Containerised with Docker; deployed to Azure App Service + Azure SQL Database via a GitHub Actions CI/CD pipeline with environment-secret management.

RCPOS & RCPOS Lite — Restaurant Point-of-Sale System

PHP · Laravel · JavaScript · MySQL · Local Storage API · Reliance Corporation Internship

- Developed a full production restaurant POS system and an offline-capable browser version (Local Storage API for intermittent-connectivity sync) using PHP, Laravel, JavaScript, and MySQL — both deployed to live client environments during the Reliance Corporation internship.
- Authored QA test cases, documented defects, and verified fixes before each production deployment; led on-site staff training sessions.

Light of Literacy — Library Management System · 94% Distinction, Highest in Cohort

Kotlin (Android) · Node.js / Express · MySQL · Firebase · Azure DevOps · Netlify

- Led a 3-person Agile team across 5 sprints to deliver a complete library platform — Kotlin Android frontend, Node.js/Express REST APIs, and a hybrid MySQL + Firebase database for 100+ concurrent users with offline sync.
- Configured Azure Repos and Azure Pipelines for CI/CD; deployed live website to Netlify with automated build triggers. Authored an 18-case Test Plan achieving 85% code coverage via JUnit and Postman.
- Produced full system design documentation: high-level and low-level architecture, ERDs, use-case diagrams, and class diagrams.

EXPERIENCE

Junior IT Engineer (Operations & Software Coordination)

Reliance Corporation, Johannesburg · Feb 2026 – Present

Software Development Coordination & Business Analysis

- Selected to formally join the software development team; currently ramping up on the company's existing stack in parallel with current operational duties — transition in progress.
- Gather and document software requirements from internal stakeholders and customers, translating business needs into Business Requirement Documents (BRDs) used directly in sprint planning.
- Review software builds against documented requirements, providing structured bug reports and QA feedback before production releases; track sprint deliverables and communicate progress to management.

IT Infrastructure & Operations

- Maintain and troubleshoot Windows and Linux servers, ensuring system availability for internal and client-facing operations.
- Perform network infrastructure installations including structured cabling, port configuration, and connectivity testing across multiple client sites; install and configure IP camera systems.

Quality Assurance & Customer Deployment

- Conduct structured QA regression and UAT testing across retail POS, inventory, and management systems — reducing post-deployment incidents.
- Lead customer training sessions and on-site software deployments; provide Tier 1/2 ITIL-aligned technical support.

IT Software & Hardware Support Intern

Reliance Corporation, Johannesburg · Aug 2025 – Jan 2026

- Selected for a structured 6-month internship rotating across software development, network infrastructure, and IT support.

Software Development & QA (Aug – Nov 2025)

- Completed a 10-week full-stack training programme (HTML5, CSS3, JavaScript, MySQL, PHP) with hands-on assessed projects.
- Developed RCPOS (restaurant POS system) and RCPOS Lite (offline-capable browser version) using PHP, Laravel, JavaScript, and MySQL — both deployed to live client environments, including on-site staff training.
- Wrote QA test cases, documented defects, and verified fixes before each production deployment.

Infrastructure & Networking (Nov – Dec 2025)

- Led the physical network rebuild during an office relocation — mapped, re-punched, and crimped RJ45 connectors for all Ethernet ports; patched into managed switches and server rack. Installed and configured IP camera systems.

Hardware Support & Helpdesk (Dec 2025 – Jan 2026)

- Provided Tier 1/2 support across Windows and Linux; managed the full IT asset registry — catalogued hardware, assigned to users, and maintained accurate inventory.

Project Manager & Full-Stack Developer (Academic Capstone)

Cogent Creations / Rosebank College WIL, Braamfontein · Jan 2024 – Dec 2024

- Managed a 3-person Agile team across 5 sprints using Azure DevOps Boards, delivering Light of Literacy against customer acceptance criteria.
- Built the complete system end-to-end: Kotlin Android frontend, Node.js/Express REST APIs, and hybrid MySQL + Firebase database — earning 94% Distinction, highest in cohort.
- Produced full system design artefacts: high-level and low-level architecture, ERDs, use-case diagrams, and class diagrams.

TECHNICAL SKILLS

Languages	JavaScript (ES6+), TypeScript, PHP 8, C#, Kotlin, Java, SQL
PHP & Laravel	Laravel 11, Eloquent ORM, Sanctum, Blade, Artisan, Queues, Middleware
Frontend	Angular 17, React 18 (TypeScript), RxJS, Angular Material, Tailwind CSS, HTML5, CSS3
Backend & API	ASP.NET Core 9 (Dapper, SignalR, JWT), Node.js / Express — REST API design & versioning
Databases	MySQL, SQL Server (SSMS), Firebase Realtime DB — schema design, ERDs, normalisation
Cloud & DevOps	Azure (App Service, SQL DB), Docker, GitHub Actions, Azure Pipelines, Laravel Forge, Netlify
IT & Network	Windows Server, Linux, structured cabling, managed switches, IP cameras, ITIL
Testing	JUnit 5, Postman, test plan authoring, UAT, regression — 85–95% coverage across projects

EDUCATION

Diploma in IT Software Development | NQF Level 6 · 360 Credits

Rosebank College, Braamfontein, Gauteng · Graduated Dec 2024

- Distinctions (PD) in 9 modules — highest cohort score in WIL 3B (94%).
- Key distinctions: Web Development (82%), HCI (91%), Advanced Databases (76%), Software Quality & Testing (77%), Applied Programming (70%).

National Senior Certificate | Higher Certificate & Diploma Pass

Horizon International High School, Turffontein · Dec 2020

CERTIFICATIONS

- SkillUp Full Stack Development — Certificate of Completion
- SkillUp Cloud Computing Fundamentals — Certification
